Colorado's Decision Support Systems (CDSS): Overview of Colorado's Water DSS and Application in the Yampa River

Brian MacPherson and Lisa Brown will present on the State of Colorado's water resources data, tools, and modeling platform that create Colorado's Decision Support Systems and discuss a recent application of the DSS in the Yampa River. Brian will cover origins of the DSS, how the components of the DSS fit together, and give us a brief idea of the future. Lisa will talk about a recently completed project for the Yampa/White/Green Basin Roundtable using the DSS, what the benefits are to stakeholders, and some lessons learned.
